CONFERENCE PROGRAM

4th French SNOM (optical nanospectroscopy) meeting

23–25 November 2026

VENUE **Synchrotron SOLEIL** L'Orme des Merisiers Dp 128, 91190 Saint-Aubin, France

Monday, 23 November

Talks, poster session, dinner

09:00–09:10	Opening remarks
09:10-10:00	**Rainer Hillenbrand - "Introduction to near-field microscopy"**
10:00-10:30	Gergely Nemeth - "Infrared nanospectroscopy at the SMIS beamline"
10:30-11:00	**Coffee break**
11:00-12:30	**Session 1: Polaritons**
11:00–11:30	Jean-François Lampin — “High quality factor ultraconfined THz phonons-polaritons in PbI2”
11:30–12:00	Ana I. F. Tresguerres-Mata — “Exploring nanoscale light-matter interactions in anisotropic van der Waals crystals”
12:00–12:30	Christian Lanza — “Design of Phonon Polariton Propagation in Thin Layers of Highly Anisotropic Crystals”
12:30-14:00	**Lunch**
14:00-16:00	**Session 2: Plasmonics and photonics**
14:00–14:30	Baptiste Fix — Imaging the local field around mutlimodal or coupled nanostructures
14:30–15:00	Gergely Nemeth — “Pushing the limits of infrared nanospectroscopy”
15:00–15:30	Florian Dell'ova — “SNOM imaging of vortex generation in plasmonic nanodisks”
15:30–16:00	Essowéréo Tchao — “Topology optimized photonic integrated 50:50 splitter and 90-degree bend waveguide in telecom C-band probed via scattering near field scanning optical microscopy”
16:00–17:30	**Group photo, Poster session & Coffee**
18:00–	Conference dinner

Ce workshop a bénéficié d'une aide de l'État au titre de France 2030 (PhOM -Graduate School Physique) portant la référence ANR-11-IDEX-0003

Tuesday, 24 November

Talks, live demo, roundtable

09:30–10:20	**Georg Ramer — "Introduction to atomic force microscopy-infrared spectroscopy (AFM-IR)"**
10:20-10:50	**Coffee break**
10:50-12:20	**Session 3: Methods and complex samples**
10:50–11:20	Philip Schäfer — "A multimodal nanoscale optical toolkit for comprehensive material characterization: s-SNOM, AFM-IR, AFM-Raman, TERS..."
11:20–11:50	Aude Lereu — "Nanoscale Insights into Natural and Synthetic Wood"
11:50–12:20	Adrian Cernescu — "Sample Preparation and Practical Considerations for s-SNOM Measurements"
12:30–14:00	**Lunch**
14:00-15:30	**Session 4: Material characterization**
14:00–14:30	Laure Tailpied — "Quantification of the performance of the s-SNOM to characterize the dielectric function of dielectric thin films"
14:30–15:00	Yousra Mazloum — "Nanoscale Infrared Imaging and Spectroscopy of Thickness-Driven Polar Phase Transition in PbZrO3 Membranes"
15:00-15:30	**Coffee break**
15:30-16:30	Live Demo - Synchrotron infrared nanoscale spectroscopy
16:40-17:10	Round table discussion

Wednesday, 25 November

Visits at Onera and test measurements at SOLEIL

	Test measurements for registered people in SOLEIL
	Visits for registered people at ONERA

Ce workshop a bénéficié d'une aide de l'État au titre de France 2030 (PhOM -Graduate School Physique) portant la référence ANR-11-IDEX-0003

Posters

1. Laure Tailpied — “Cryogenic s-SNOM imaging of non-volatile conductive filaments induced by electrical pulses in $(V0.95Cr0.05)_2O_3$”
2. Marjolaine Cornu and Amandine Andrieux-Ledier — “Multi-scale characterization of CVD BN films with s-SNOM”
3. Nadezhda Shchedrina — “Near-field optical response of femtosecond-laser-induced anisotropic nanoporous modifications in silica”
4. Martin Bearzatto — “Optimization of Gap-Plasmon Resonators for sensor applications”
5. Lilian De Thevenot — “Single antenna effect on photonic materials: discussion on hyperuniform arrays and single antenna response.”
6. Roudy Barrak — “Towards Tip-Enhanced Magneto-Optical Microscopy: Modelling Optical Coupling Between a Nanosphere and a Magnetic Film”
7. Adrian Cernescu — “Nano-IR spectroscopy for nanoplastics identification down to 10 nm particle size"
8. Gergely Nemeth - "Quasar - open-source and democratic data processing"

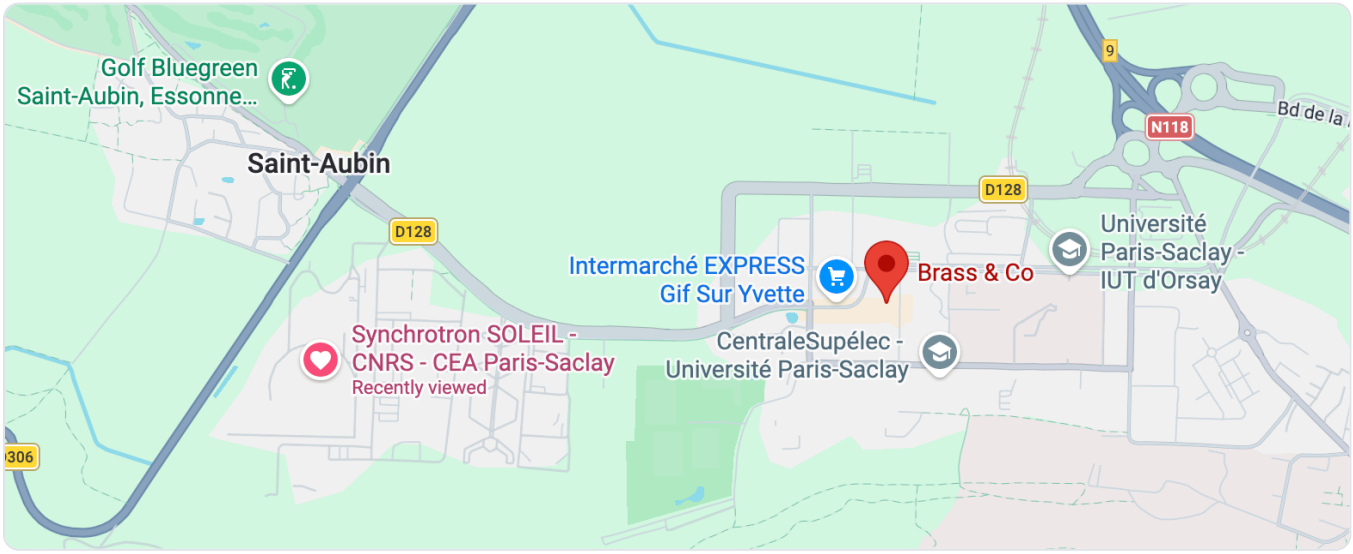

Conference dinner

The gala dinner will take place in the close proximity of SOLEIL. The attandance is limited to registered people.

Restaurant: Brass & Co

Address: 24 - 26 Mail Pierre Potier, 91190 Gif-sur-Yvette, France

Getting there: Walk (15 min), Bus 5154, 4606, 4609, 4614 (10 min)

Ce workshop a bénéficié d'une aide de l'État au titre de France 2030 (PhOM -Graduate School Physique) portant la référence ANR-11-IDEX-0003
